

**THE FIRST INTERNATIONALLY
VALIDATED EUROPEAN GUIDELINES
MEETING ON MINIMALLY INVASIVE
PANCREATIC SURGERY**

**Brescia, Camera di Commercio Auditorium
SEPTEMBER 29-30, 2022**

I'm extremely honored to host you at this important event where we will celebrate the international validation of the first European Guidelines on Minimally Invasive Pancreatic Surgery. The guidelines are the result of more than a year of scientific work and analyses, where a large group of researchers from several European countries reviewed the whole body of literature on many relevant topics in the field of minimally invasive pancreatic surgery and identified all valid publications to be analyzed. The summary of this work was used by our expert committee to formulate 112 statements that were accepted via a Delphi consensus when an agreement of 80% and above was reached.

A high-caliber validation committee and an expert renowned jury committee were continuously informed and updated on the process and will play an important role in validating the experts' work and statements through a well-developed validation methodology (AGREE II).

It is a great honor to me and my city and a great achievement for the pancreatic surgical community as well to have all those great minds behind the formulation of these guidelines in Brescia and to have many of you as participants and assessors of this work. It is our great pleasure to continue to work and shape the history of pancreatic surgery, always aiming for improvements and excellence in patient care.

I sincerely hope that the meeting will be a memorable experience for all of you and for what it will offer in scientific evidence assessment and development. The EGUMIPS in Brescia will certainly hold an important place in the history of pancreatic surgery. The outcomes of this event will shape the future direction of our profession and our patients' outcomes, and it is my greatest pleasure to share with you the honor of being part of this event.

I would like to take this opportunity to thank all the members of the expert, validation, jury, and research committee for their support, hard work, and friendship.

Welcome to EGUMIPS, Welcome to Brescia.

THE FIRST INTERNATIONALLY VALIDATED EUROPEAN GUIDELINES MEETING ON MINIMALLY INVASIVE PANCREATIC SURGERY

BRESCIA, CAMERA DI COMMERCIO AUDITORIUM - SEPTEMBER 29-30, 2022

The upcoming First European Guidelines meeting in Minimally Invasive Pancreatic Surgery will see the development of the first European Guidelines in the field of minimally invasive pancreatic surgery. The new established guidelines will have the peculiarity of including separate guidelines for Laparoscopic and for Robotic pancreatic surgery, the guidelines will assess available devices in the field, their safety, validity and potential role in Pancreatic Surgery and will be developed according to scientific methodologies taking in consideration the available evidence and experts' opinions. The scientific methodologies will be similar to those used for the successful Southampton Guidelines on Laparoscopic Liver Surgery. The upcoming meeting has a great potential, considering the high scientific content. This is also based on the involvement of more than 20 experts in Minimally Invasive and in open Pancreatic Surgery from Europe and 10 renowned international experts who will validate the guidelines and thus adding an international impressment for future development.
